About FuseBox

The FuseBox range of 3 phase circuit protection devices and enclosures offers a practical solution for commercial, industrial, and where required domestic installations.

All enclosures are supplied with a 125A 4 pole main switch as standard and T2 factory fitted Surge Protection Device (SPD).

Robust 1.2mm galvanised steel enclosure to ensure a long life in the harshest of environments, finished in RAL 9001 epoxy powder coating.

Fully shrouded neutral terminals and incoming devices from 3 to 15 usable ways when a T2 SPD protected distribution board is selected (TPN**FBX).

TPN boards will accept FuseBox 6kA devices without any modification or additional hardware.
